

Policy on Waste Reduction

At Traveo, we're committed to reducing waste and fostering a sustainable environment. Embracing a paperless office model, we've completely eliminated paper usage in our office, digitizing our operations while protecting our planet. In our kitchen, we have reusable ceramic coffee cups, moving away from disposable alternatives. This initiative not only reduces our waste footprint but also enhances the daily coffee experience for our team. Through these efforts, Traveo leads by example in environmental stewardship, knowing that small changes can make a big difference.

Pollution Reduction Policy

To do our part to protect the environment, we have a commitment to reducing pollution into the fabric of our company culture. We've turned our backs on harmful chemicals in favor of greener, safer alternatives for everything from pesticides to paints and cleaning agents. Our approach includes management of chemical use, ensuring safe storage, usage, and disposal. To keep our office sparkling, we rely on Sonnets' range of eco-friendly cleaning products, crafted from natural, plant-based materials.

Transport Policy

We use transfer companies who comply with Environmental Management Standard ISO14001:2015 and that have an environmental policy that is in line with our own.

Sustainable Accommodation Policy

We prefer to partner with hotels and other accommodation who operate according to ISO 14001 (International Standard for Environmental Management Systems)

We prefer partner accommodation that has a clear environmental policy including conservation of natural resources through the responsible use of energy, water and materials alongside minimisation of waste, but also maintaining the quality of service expected by our clients.

All of the energy and water in Iceland is from 100% renewable sources, therefore the carbon footprint on the country per guest is reduced.
